#PASSIONFORTHEGAME

We take hockey seriously. Both recreational and professional hockey. This passion and dedication make us aware of the hockey player's needs and lead to a culture of product innovation. It is hardwired in us. Our brand vision as a brand is to be the player's number one choice. Our mission is to enable the highest individual and team performance and unforgettable moments through reliable, user-friendly products. By doing so, we believe we will empower more people to find and share this passion because, to us, hockey is not a lifestyle. It's life.

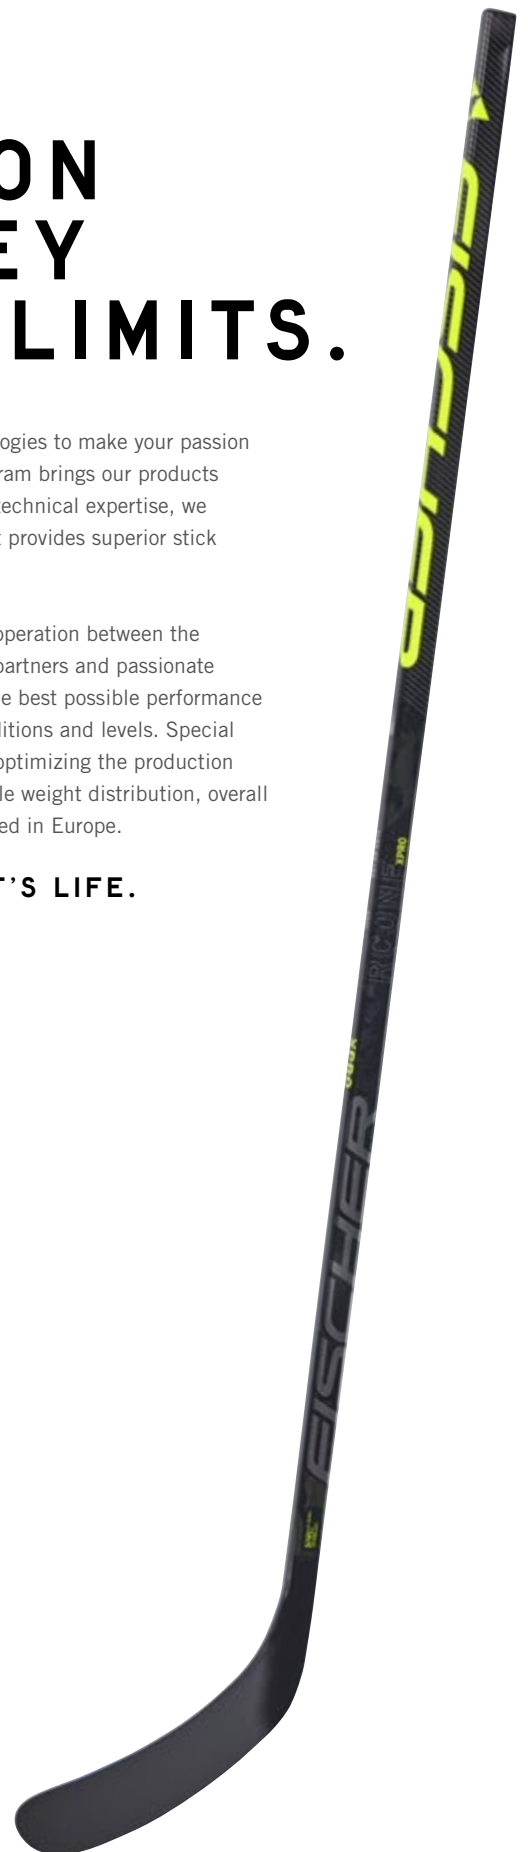

THE PASSION FOR HOCKEY KNOWS NO LIMITS.

Every Fischer product has specific features and technologies to make your passion exhilarating and enjoyable. Our new RC ONE stick program brings our products closer to meeting players' needs. Through passion and technical expertise, we developed a line of real composite one-piece sticks that provides superior stick handling, shooting power and shooting performance.

The RC ONE line results from 30 months of intense cooperation between the development department, production, worldwide sales partners and passionate hockey players. The goal was to enable players to get the best possible performance out of each ice practice or game, regardless of the conditions and levels. Special attention was paid to using superior raw materials and optimizing the production during the development process to gain the best possible weight distribution, overall balance and durability. The RC ONE line is manufactured in Europe.

HOCKEY IS NOT A LIFESTYLE. IT'S LIFE.

RC ONE XPRO

ARE YOU READY FOR THE NEW RC ONE?

High-end performance stick for guaranteed success. The RC ONE XPRO is designed to meet the top player's demands. Built as a true One-piece construction for maximum energy transfer to utilize all the energy you release. Advanced fiber placement and sharp fiber orientation allow a quicker release to get your shot off more easily. In addition, integrated carbon bridges stabilize the blade challenging goalies with powerful shots.

RC ONE IS4

VERSATILITY AT IT'S BEST.

The lightest stick of the IS family, the new IS4, shares key technologies with our high-end sticks. Using UD carbon combined with glass fiber opens up many possibilities. While glass fiber guarantees higher impact strength, carbon layers secure easy loading and optimized control. High-impact modified ABS blade core combined with carbon fiber makes the IS4 tough enough for any surface, whether ice, concrete, or hard plastic.

STICKS / TECHNOLOGIES / COMPOSITE / GOALIE

STICK TECHNOLOGY	TECH FEATURES COMPOSITE STICKS		
	MONOCOMP TECHNOLOGY A true 1-piece construction design from shaft to blade providing a matchless, pure feel of the puck.	TUNED RESIN CONTENT New advancements in prepreg manufacturing results in a reduced need of resin to guarantee superb strength and durability.	UD CARBON Ultra lightweight carbon fiber optimally placed to reduce weight without reducing strength and durability.
	SHARP FIBER ORIENTATION (SFO) Sharp fiber orientation optimizes fiber angles and their arrangement to cut weight and to diminish interlaminar shear strength without neglecting stick durability.	CAP TECH Cap Tech is a patented thin foil system wrapped around the shaft that provides more impact durability	PEEL PLY TECHNOLOGY Used to remove excess resin on the blade to save weight and enhance stick balance.
	INTEGRATED CARBON BRIDGE Extremely strong and light carbon fiber bars placed in the stressed areas of the blade for high levels of stability and stiffness	TORSOWRAP Torsional carbon fiber wrap for supreme torsional stiffness with minimal weight.	MAXIMUM ENERGY TRANSFER (MET) Maximum energy transfer through the hosel due to monocomp construction.
	POLY-AIR-BOND Poly-Air-Bond blade combines lightening fast response with puck feel and performs on and off the ice.	RESPONSIVE HOSEL TECHNOLOGY (RHT) Responsive Hosel Technology (RHT) with a wider taper for stronger torsional stiffness, increased accuracy and response.	
	TECH FEATURES COMPOSITE GOALIE STICKS		
	UD CARBON Ultra lightweight carbon fiber optimally placed to reduce weight without reducing strength and durability.	CAP TECH Cap Tech is a patented thin foil system wrapped around the shaft that provides more impact durability	TRIPLE FOAM CORE Triple Foam Core improves balance and core durability of the stick.
	DUAL IMPACT CONTROL Dual Impact Control reduces stick vibrations and maximizes player reactions.	LITE STRUCTURAL FOAM This low density, light, and durable material enables better stick handling and improves balance and weight of the stick.	SMART GRIP ZONE Grip zone between paddle and shaft provides perfect grip and control of the stick.
